IES GERARDO DIEGO
POZUELO DE ALARCÓN - MADRID
SPAIN

Introduction/Problem:

The people on the playground do not use the trash cans properly. Recently the headmaster tried to solve this by putting lots of bins all over the school, but this was useless because the playground and some classrooms are still full of trash.

Objective:

Due to the fact that the playground is full of trash, our objective is to eliminate all the waste of our food by making craftworks with some of the trash and throwing the non-reusable things to the bin.

Solution:

Our solution is to make craftwork out of trash as you can see here. People being moved out of the classroom by disciplinary measure could go to the playground and collect rubbish instead of going to the hall. Later that rubbish will be used to make craftwork.

Craft Workshop:

We can create a craft workshop and use the garbage (the ones we can use). We can recycle and create new things. First, of course, we have to clean what we are going to use, and after that we can invent whatever we want.

This idea will be developed in the main event room: the "Aula Futuro". It will be on Thursdays, as we have another activity on Tuesdays.

Action plan:

- Who? The students who will get a punishment during class.
- What? Clean the playground.
- Why? Because we need to clean the school and recycle the trash.
- Where? In our school
- How? Doing a craft workshop using the rubbish that is in the playground

We hoped you liked our idea, and we think it would be amazing if we could put it into practice.

(The images have been taken from 5 minutes craft, google and from the school).
